

I would like you to consider all of the facts before making a decision about NAB's petition 04-160. I choose to pay for my XM radio rather than listen to the local stations in Atlanta. Trying to find traffic or weather on a local radio station is iffy when the info is stuck between bad jokes and commercials. I am willing to pay for the great variety and high quality that is available from XM radio. I want to have all options available to me for the subscription cost -- including local traffic and weather. These are important channels that contribute to public safety and should be available without question to all subscribers.

Thanks for your consideration.
